RSD STAFFING · SAFETY POSTER

WATCH YOUR STEP

Most slips, trips, and falls are preventable. A few good habits keep you on your feet.

SLIPS — KEEP YOUR FOOTING

- Wipe up spills the moment you see them — or mark and report them.
- Wear slip-resistant shoes.
- Slow down on wet, greasy, or dusty floors.
- Walk, never run, and take short, steady steps.

TRIPS — KEEP THE PATH CLEAR

- Keep cords, hoses, straps, and stock out of walkways.
- Close drawers and cabinet doors.
- Put tools and materials away when you finish.
- Light your path — don't walk through dark areas.

FALLS — RESPECT THE HEIGHT

- Use handrails on stairs and ramps.
- Take one step at a time — never skip or jump.
- Use the right ladder, set it up correctly, and keep three points of contact.
- Never climb racks, shelving, or stacked loads.

SEE A HAZARD? Clean it, mark it, or report it — right away. Don't walk past it.
